Vellore Institute of Technology
(Deemed to be University under section 3 of UGC Act, 1956)

Name: Mandeep Singh

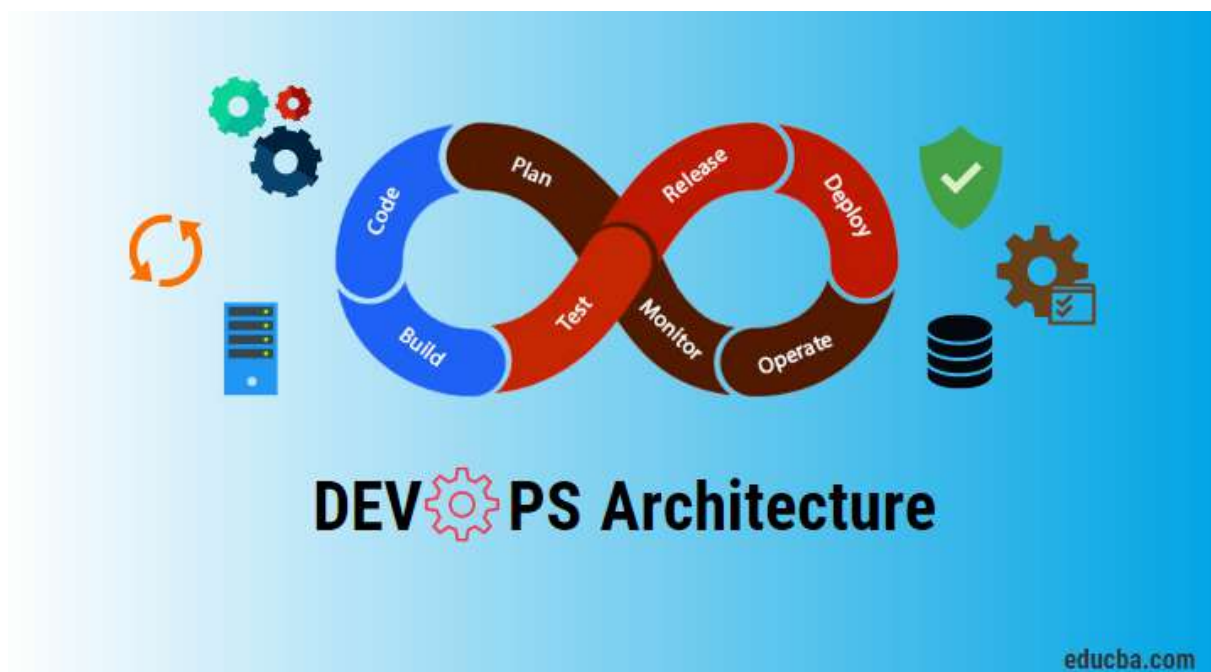

Reg no: 22MIC0165

Course Code: CSI3025

**Course Title: Application Development and
Deployment Architecture**

Slot: L33+L34(E1)

Faculty name: Sathya K

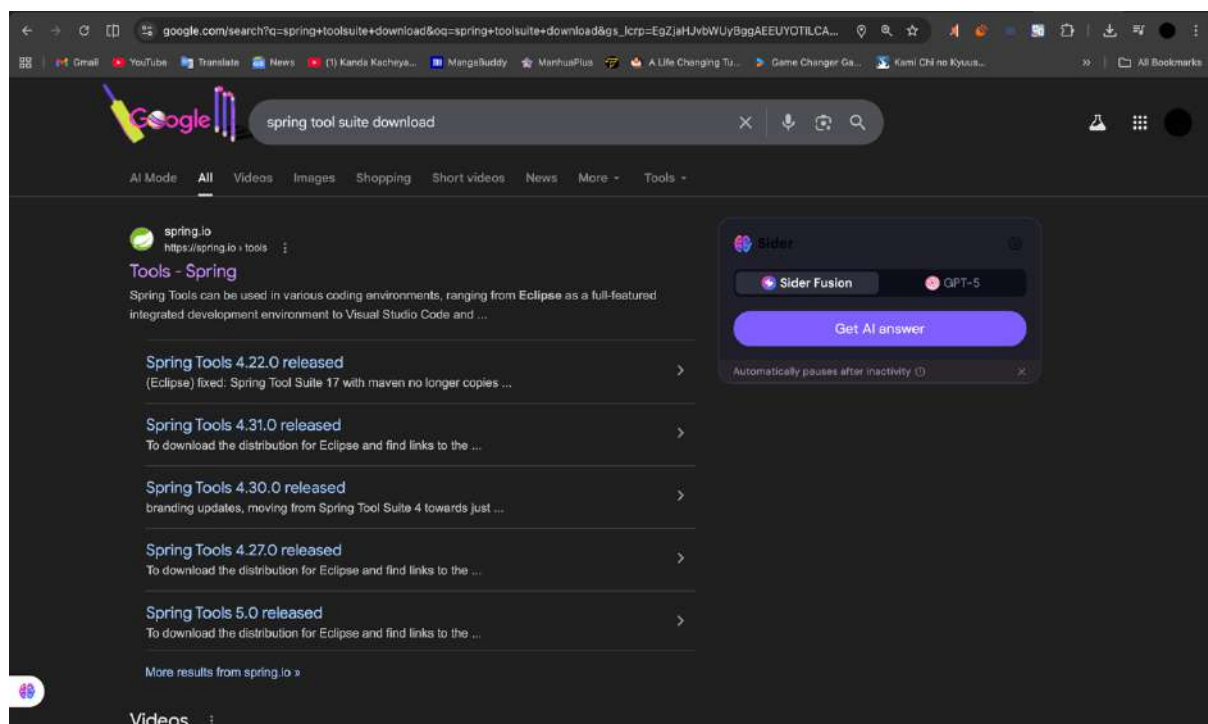

Technical Stack: Spring Tool Suite (STS) Installation

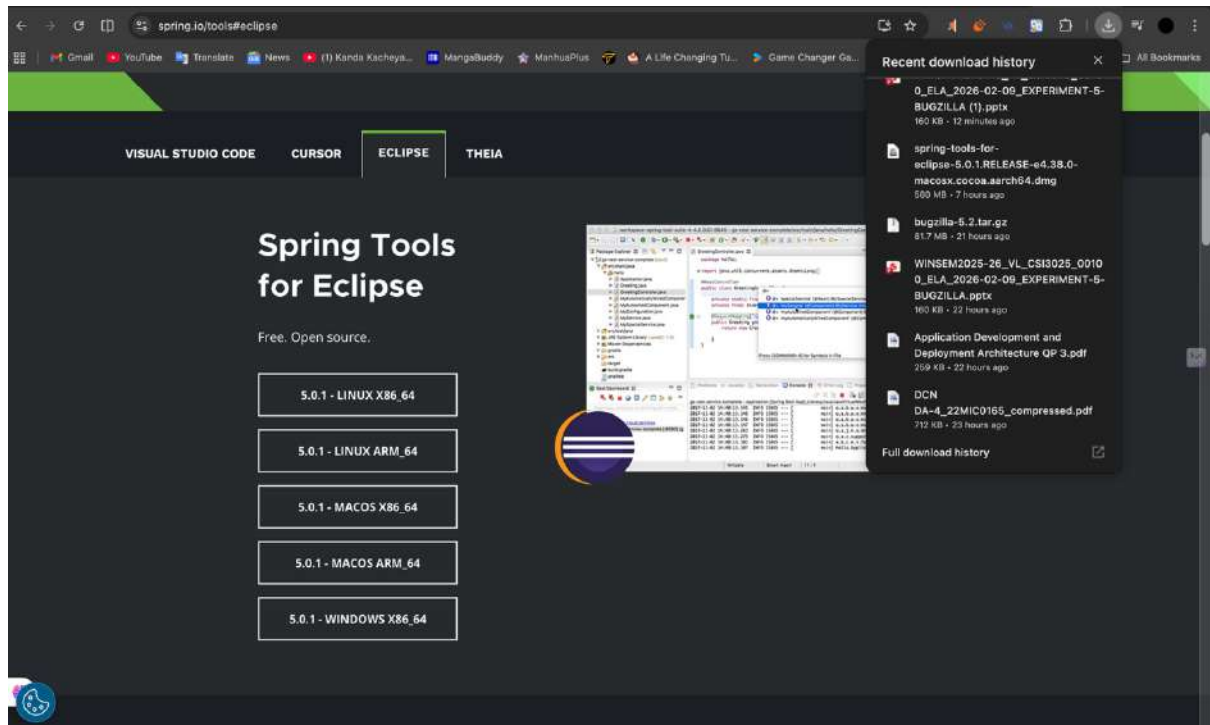

Perform the installation of Spring Tool Suite (STS) – Windows Standalone Version using Chrome browser and demonstrate the setup.

Tasks (Perform and Demonstrate)

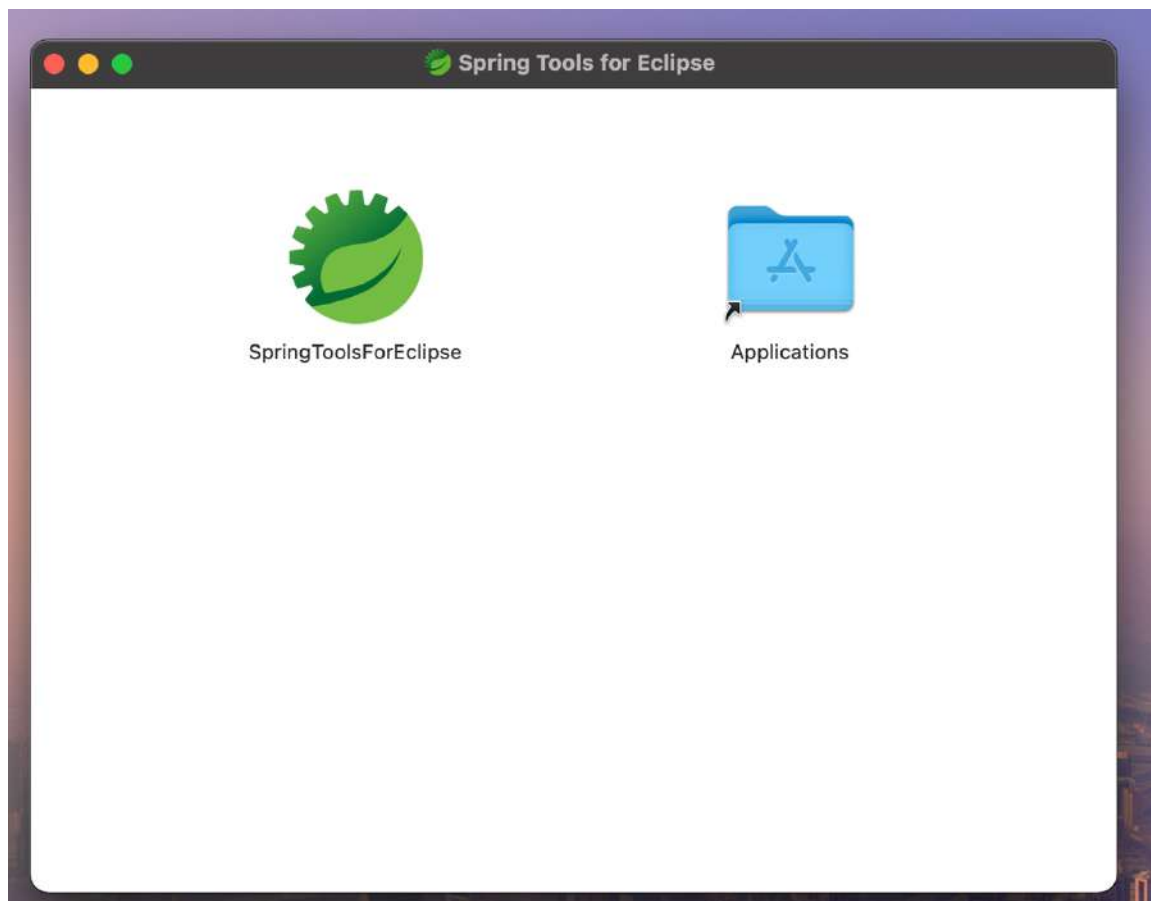

1. Open Chrome browser and search for Spring Tool Suite download.

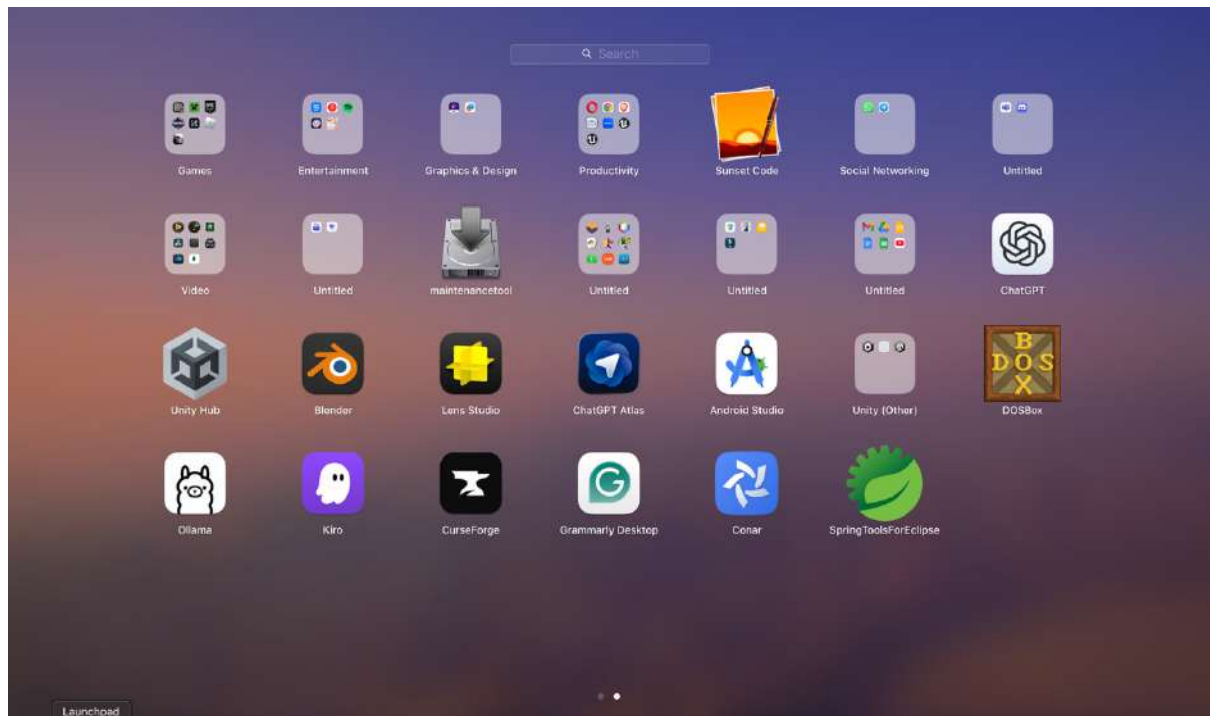

2. Download the Windows Standalone version of STS.

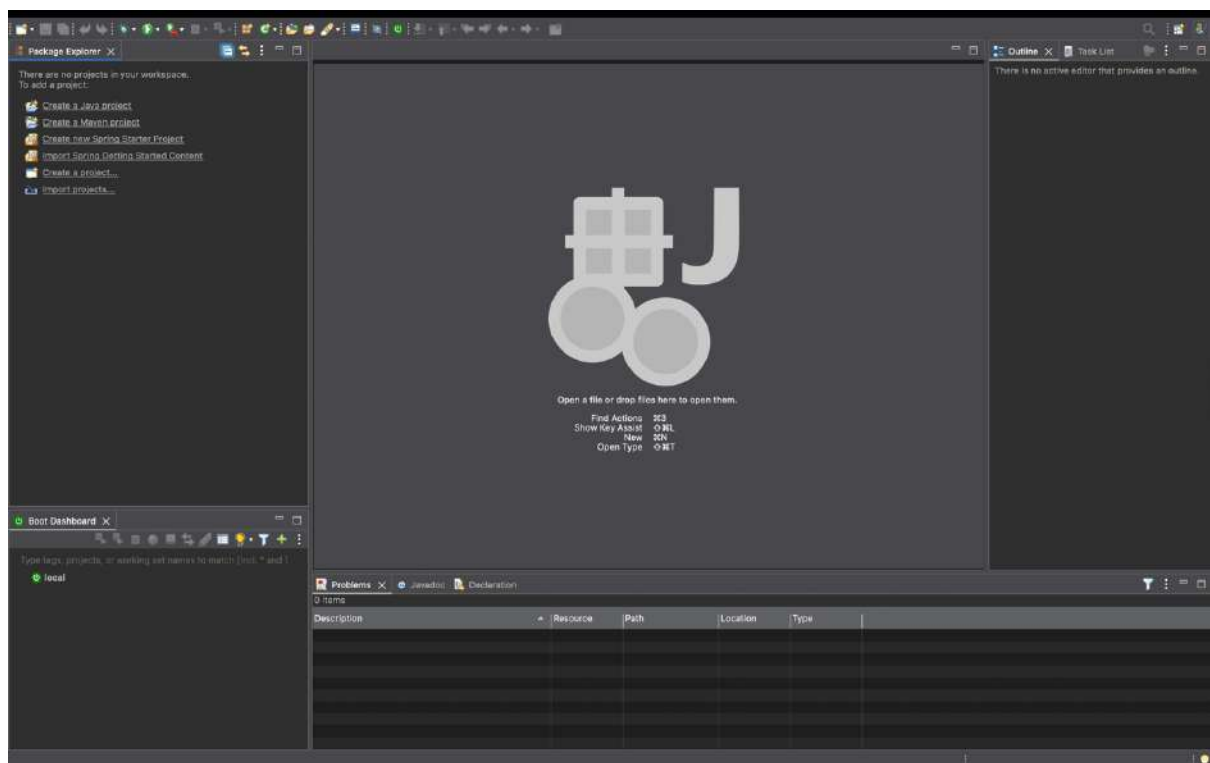

3. Extract the downloaded ZIP file.

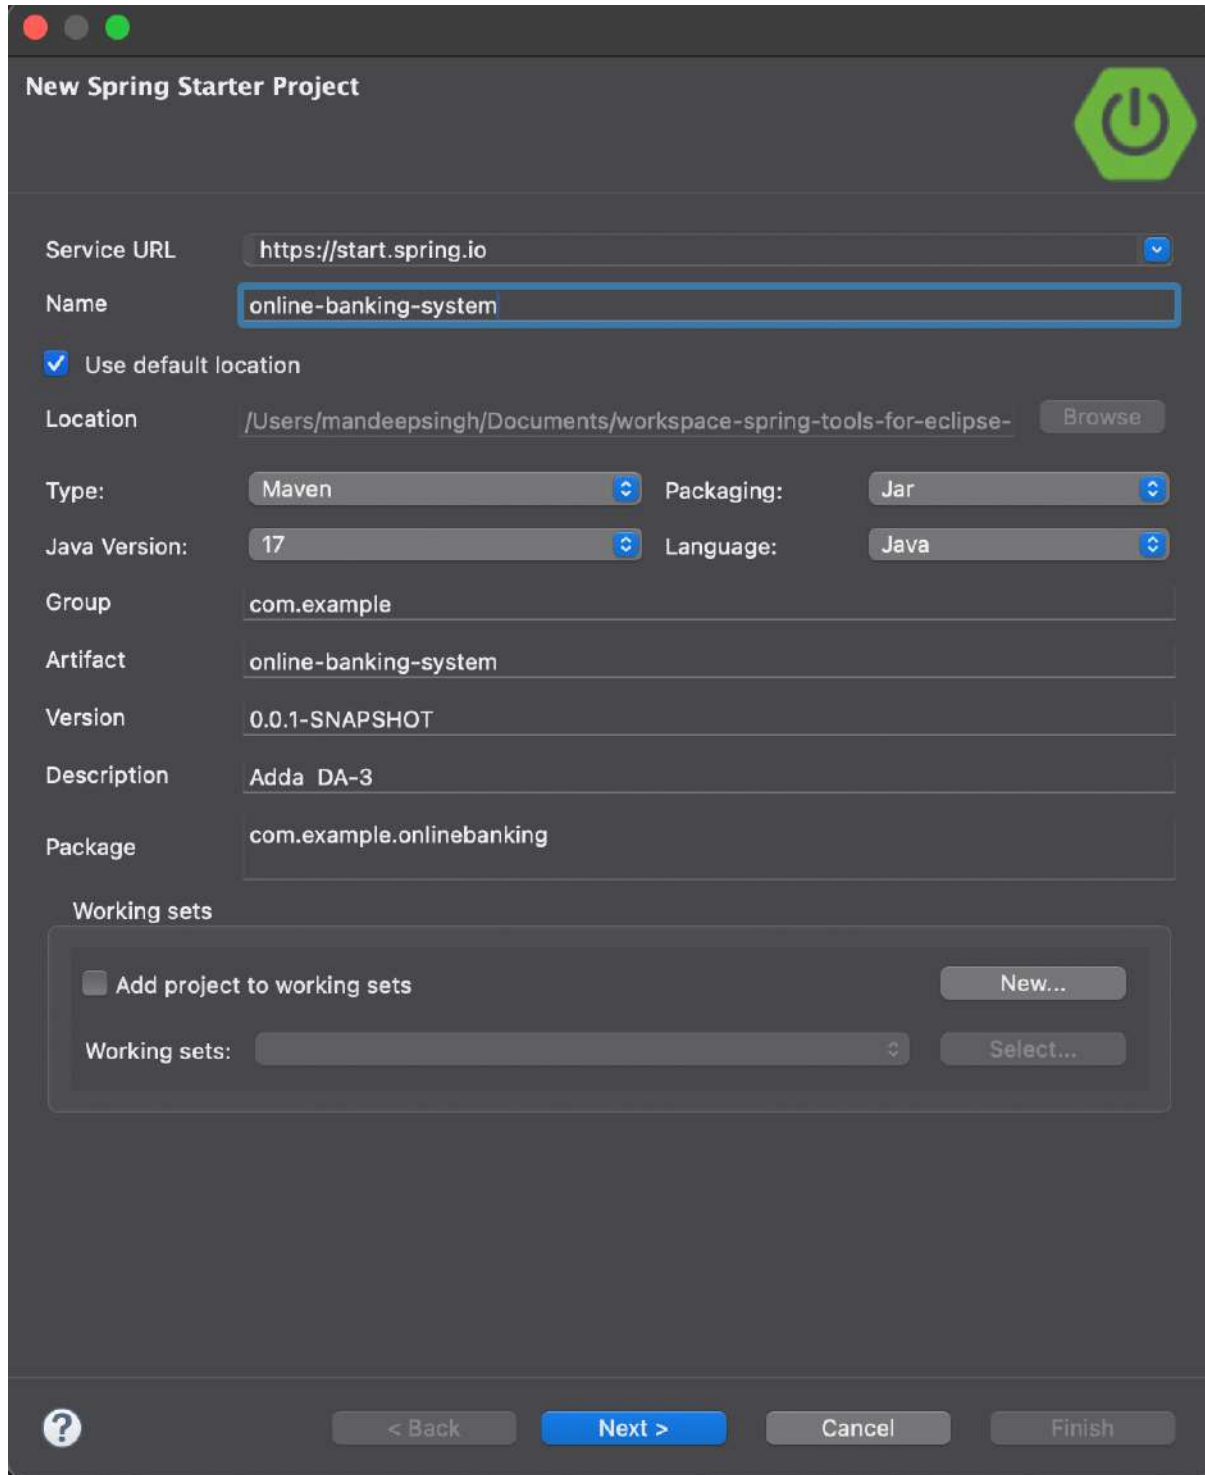

4. Launch STS from the extracted folder.

5. Set a workspace location and open the IDE.

6. Create a new Spring Starter Project.

New Spring Starter Project

9. Show the project structure in STS.

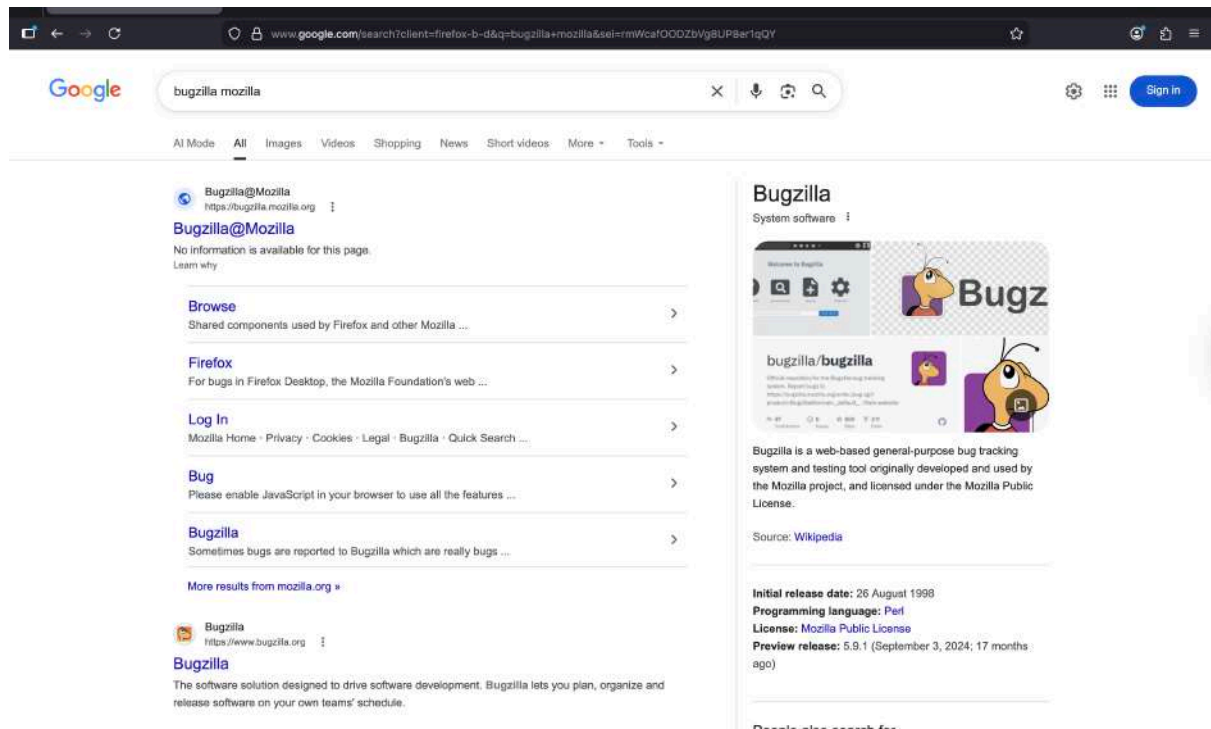

10. Demonstrate that the IDE is working properly.

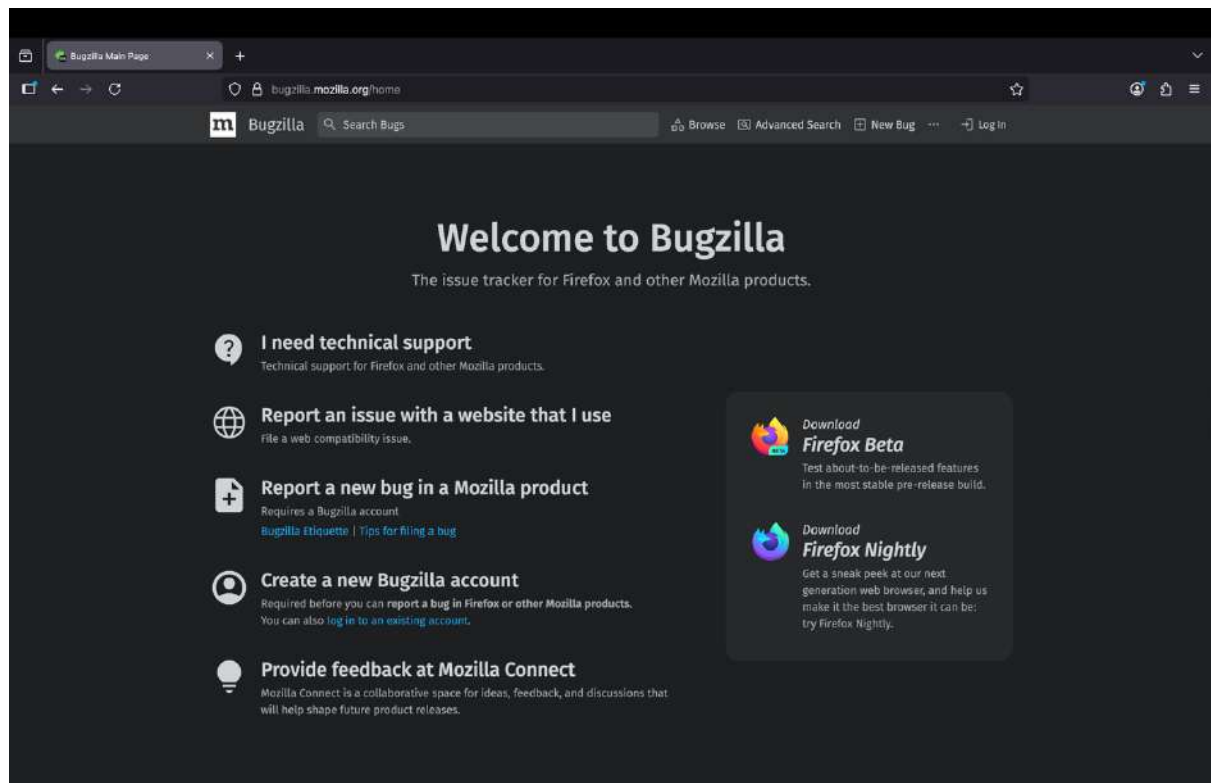

Technical Stack: STS & Bugzilla Integration

Install the Spring Tool Suite (STS) standalone version and configure the Bugzilla Connector to enable integrated, real-time defect tracking directly within the IDE.

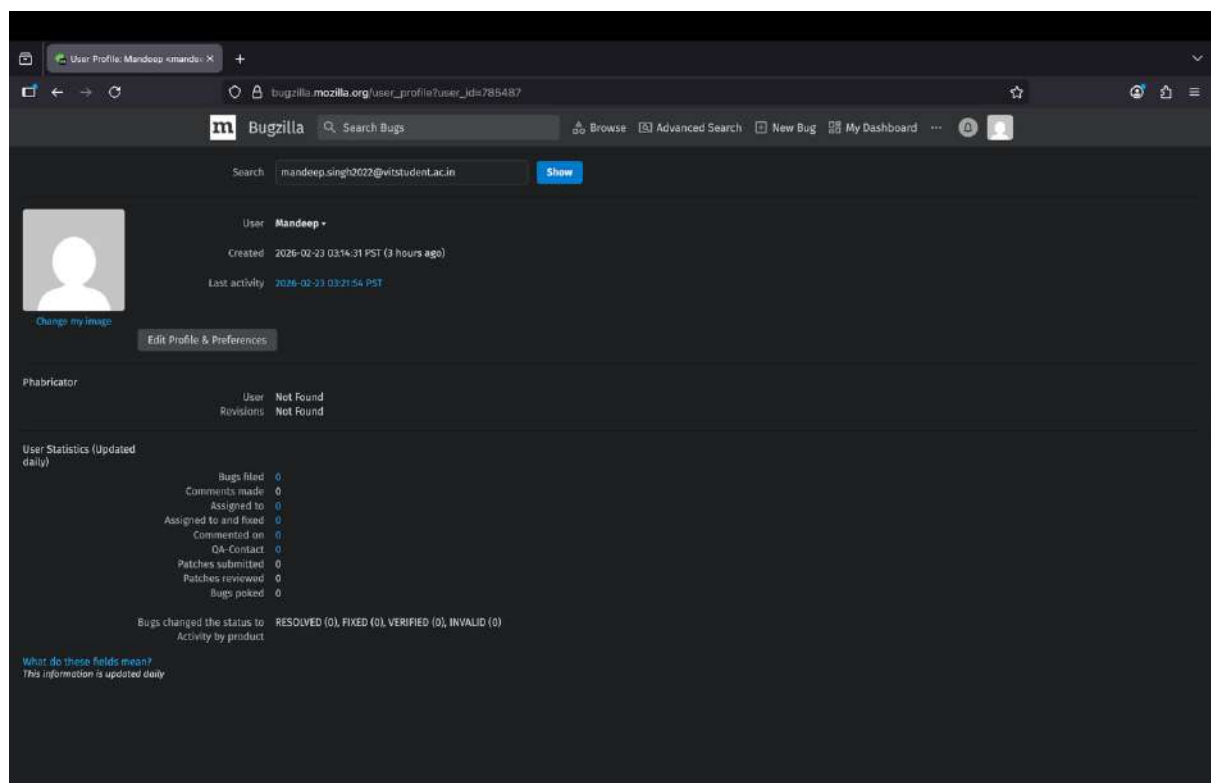

1. Open Chrome browser and search for Bugzilla

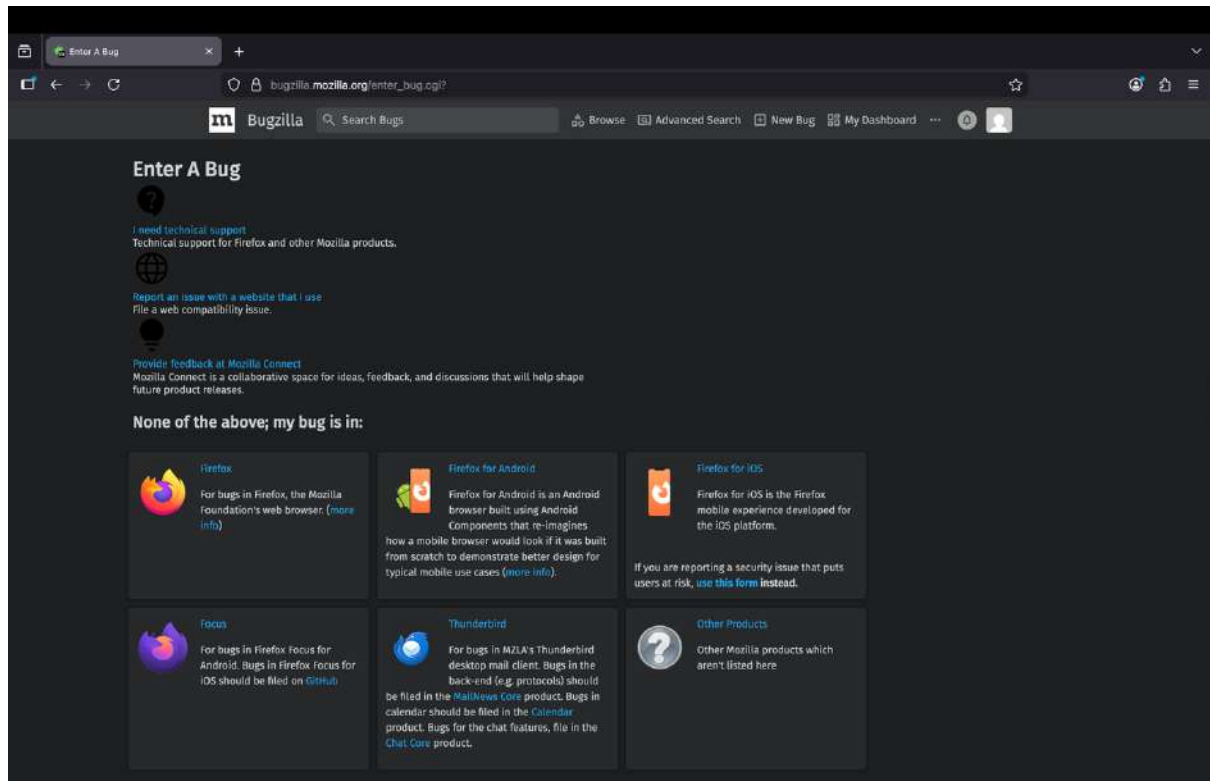

2. Open Bugzilla official website

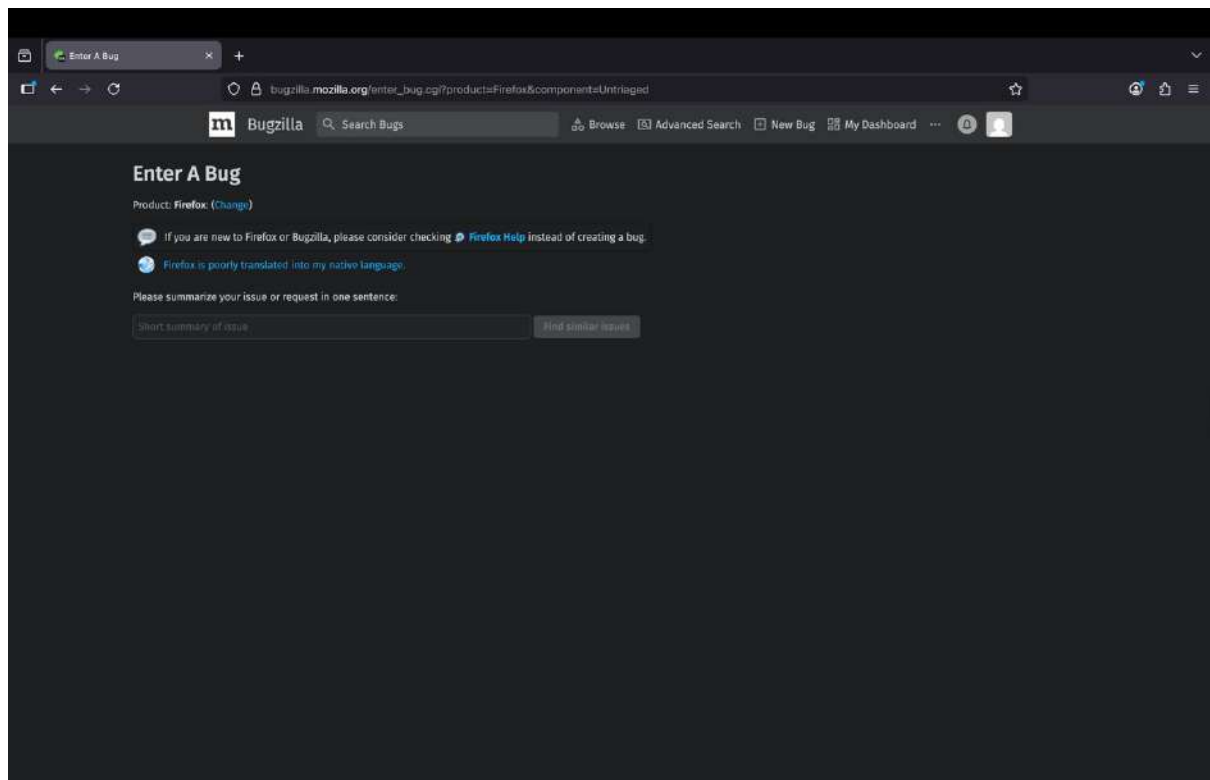

3. Login Bugzilla

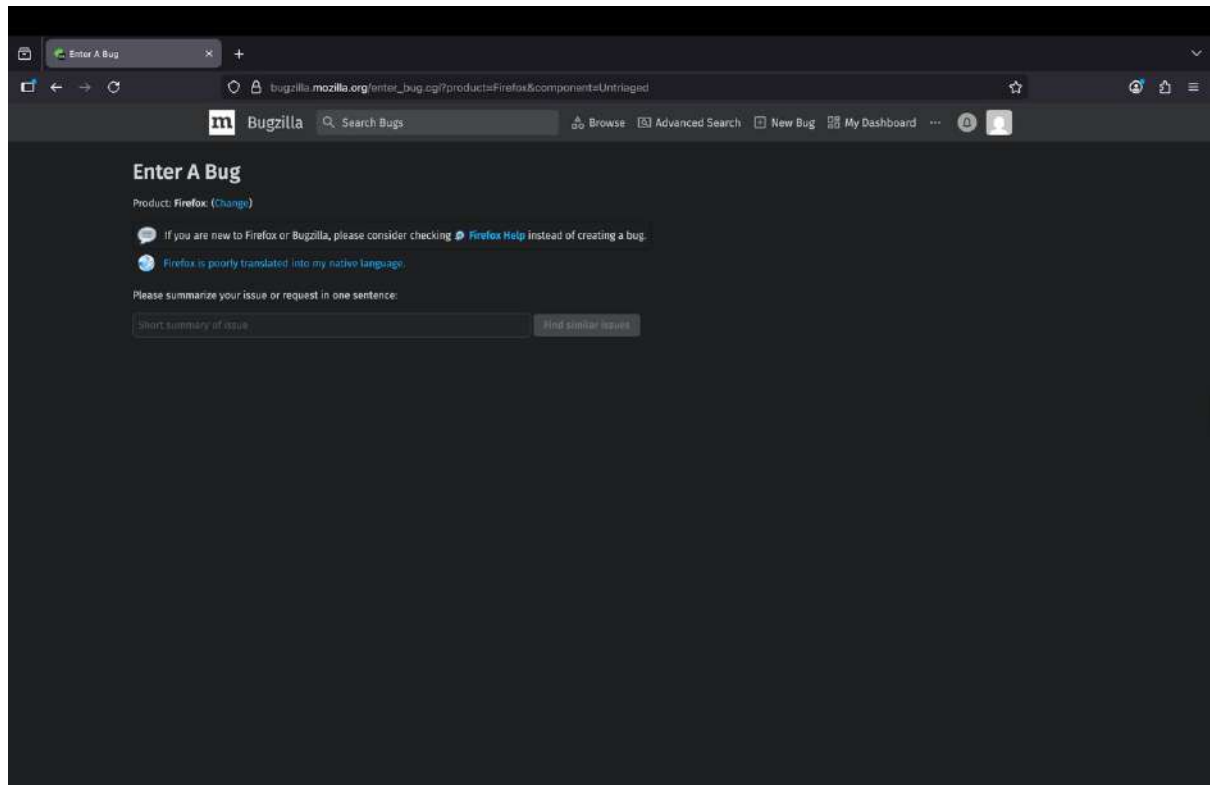

4. Find new Bug

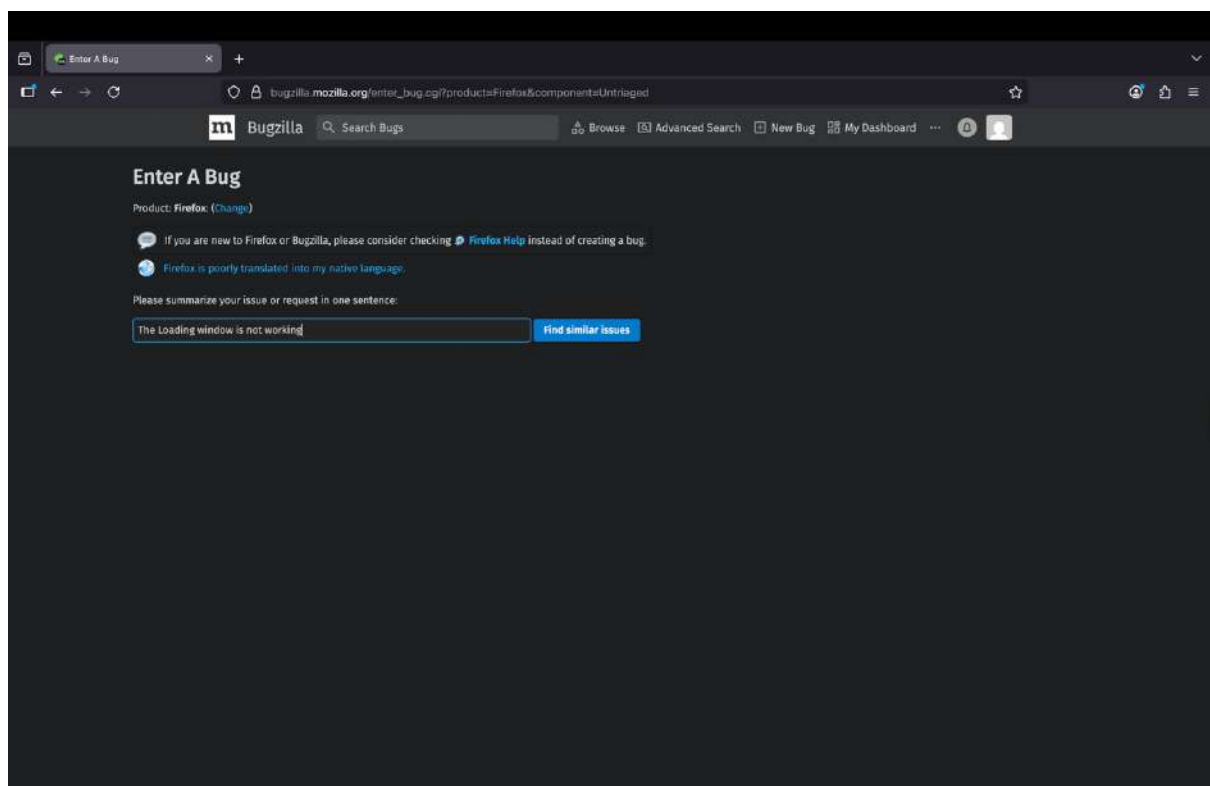

5. Select firefox

6. Enter your Bug Summary

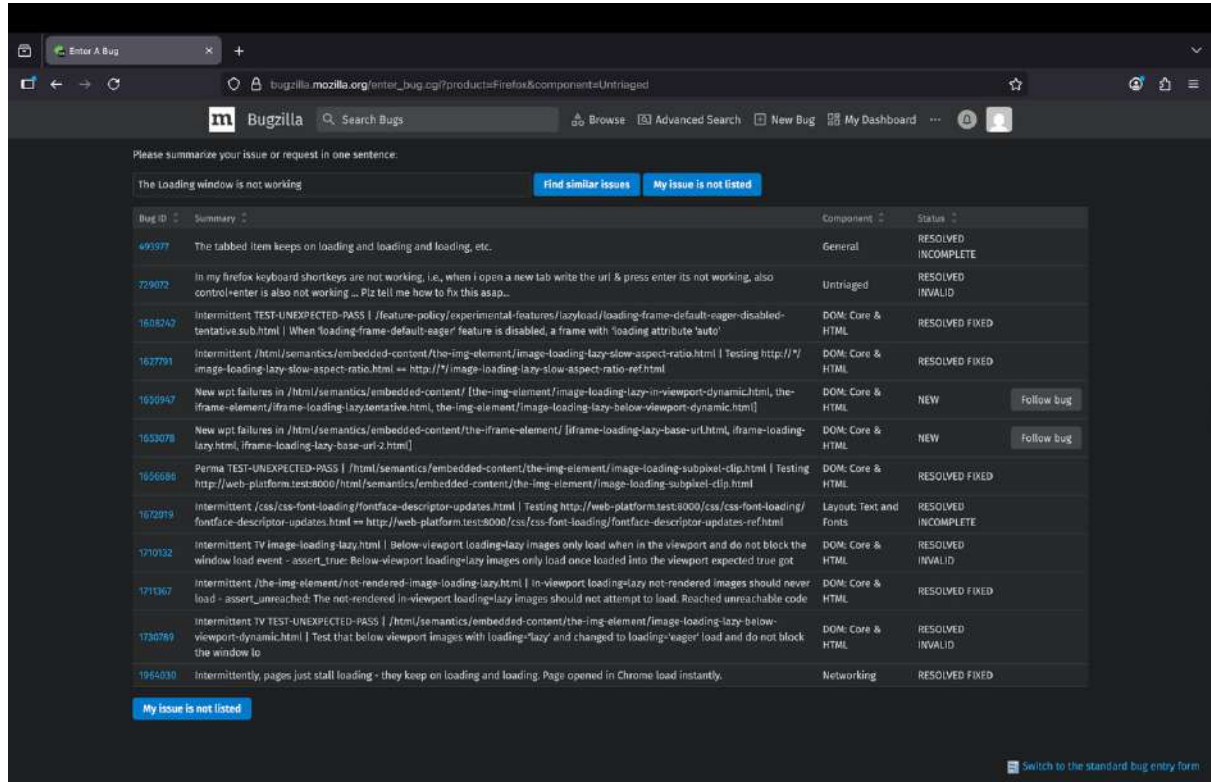

The screenshot shows the 'Enter A Bug' page on Bugzilla. The browser address bar shows the URL: `bugzilla.mozilla.org/enter_bug.cgi?product=Firefox&component=Untriaged`. The page title is 'Enter A Bug'. Below the title, it says 'Product: Firefox. (Change)'. There are two informational messages: 'If you are new to Firefox or Bugzilla, please consider checking Firefox Help instead of creating a bug.' and 'Firefox is poorly translated into my native language.' Below these, it says 'Please summarize your issue or request in one sentence:'. There is a text input field with the placeholder text 'Short summary of issue' and a 'Find similar issues' button.

The screenshot shows the 'Enter A Bug' page on Bugzilla, similar to the first one, but with the summary field filled. The text 'The Loading window is not working' is entered into the 'Short summary of issue' field. The 'Find similar issues' button is still present.

7. Find similar issues

The screenshot shows the Bugzilla 'Enter A Bug' page. The search bar contains 'The Loading window is not working'. Below the search bar, there are two buttons: 'Find similar issues' (highlighted in blue) and 'My issue is not listed'. A table of similar issues is displayed below, with columns for Bug ID, Summary, Component, and Status. The table lists several bugs related to loading issues, including 'The tabbed item keeps on loading and loading and loading, etc.', 'In my Firefox keyboard shortcuts are not working...', 'Intermittent TEST-UNEXPECTED-PASS | /feature-policy/experimental-features/lazyload/loading-frame-default-eager-disabled-tentative.sub.html | When loading-frame-default-eager feature is disabled, a frame with loading attribute 'auto'', and 'Intermittent /html/semantics/embedded-content/the-img-element/image-loading-lazy-slow-aspect-ratio.html | Testing http://*/image-loading-lazy-slow-aspect-ratio.html == http://*/image-loading-lazy-slow-aspect-ratio-ref.html'.

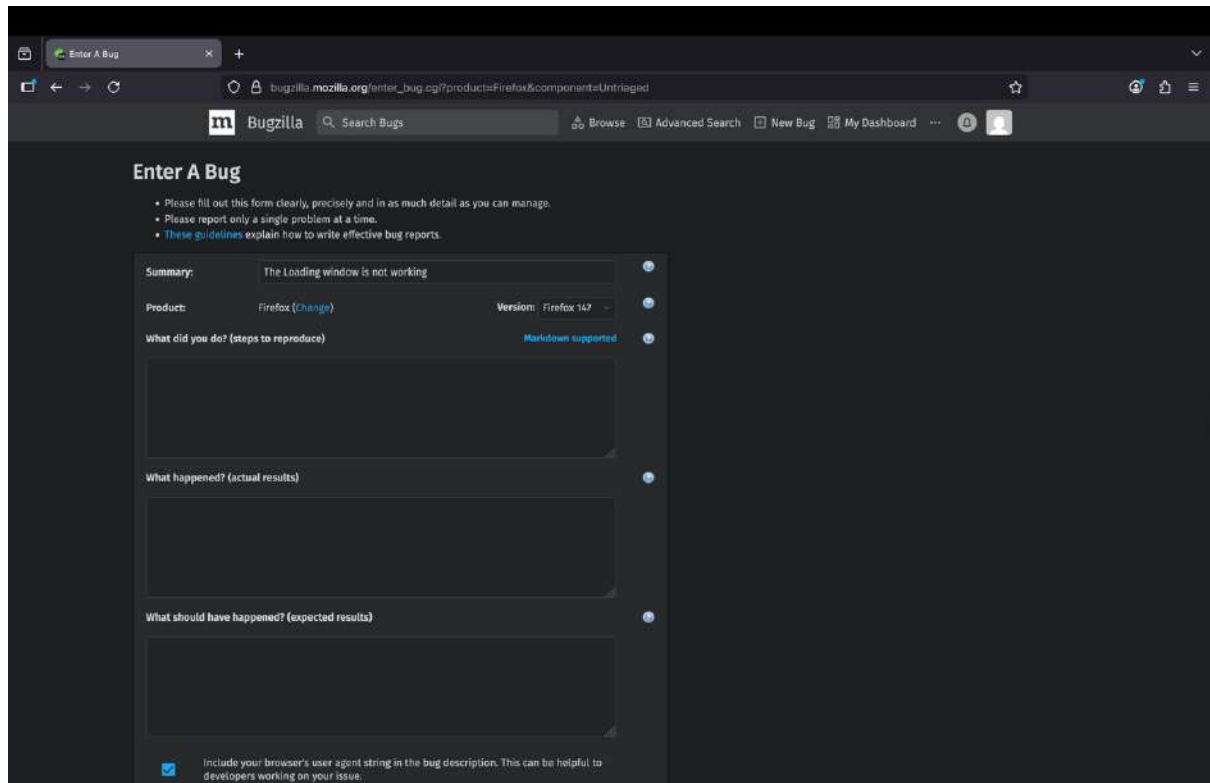

Bug ID	Summary	Component	Status
495977	The tabbed item keeps on loading and loading and loading, etc.	General	RESOLVED INCOMPLETE
729072	In my Firefox keyboard shortcuts are not working, i.e., when I open a new tab write the url & press enter its not working, also control+enter is also not working ... Plz tell me how to fix this asap...	Untriaged	RESOLVED INVALID
1608242	Intermittent TEST-UNEXPECTED-PASS /feature-policy/experimental-features/lazyload/loading-frame-default-eager-disabled-tentative.sub.html When loading-frame-default-eager feature is disabled, a frame with loading attribute 'auto'	DOM: Core & HTML	RESOLVED FIXED

1710132	Intermittent TV image-loading-lazy.html Below-viewport loading-lazy images only load when in the viewport and do not block the window load event - assert_true: Below-viewport loading-lazy images only load once loaded into the viewport expected true got	DOM: Core & HTML	RESOLVED INVALID
1711367	Intermittent /the-img-element/not-rendered-image-loading-lazy.html In-viewport loading-lazy not-rendered images should never load - assert_unreached: The not-rendered in-viewport loading-lazy images should not attempt to load. Reached unreachable code	DOM: Core & HTML	RESOLVED FIXED
1730789	Intermittent TV TEST-UNEXPECTED-PASS /html/semantics/embedded-content/the-img-element/image-loading-lazy-below-viewport-dynamic.html Test that below viewport images with loading='lazy' and changed to loading='eager' load and do not block the window lo	DOM: Core & HTML	RESOLVED INVALID
1954030	Intermittently, pages just stall loading - they keep on loading and loading. Page opened in Chrome load instantly.	Networking	RESOLVED FIXED

[My issue is not listed](#)

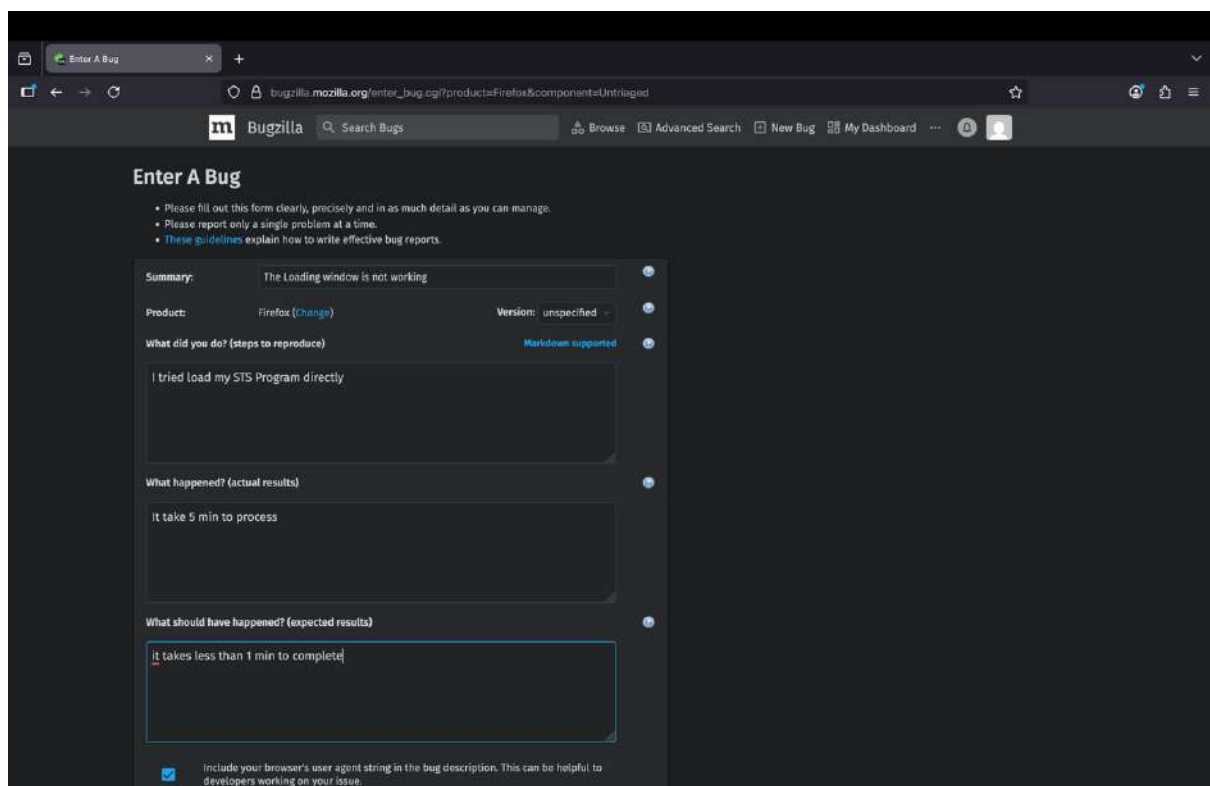

[Switch to the standard bug entry form](#)

If your issues is not listed, select my issues is not listed

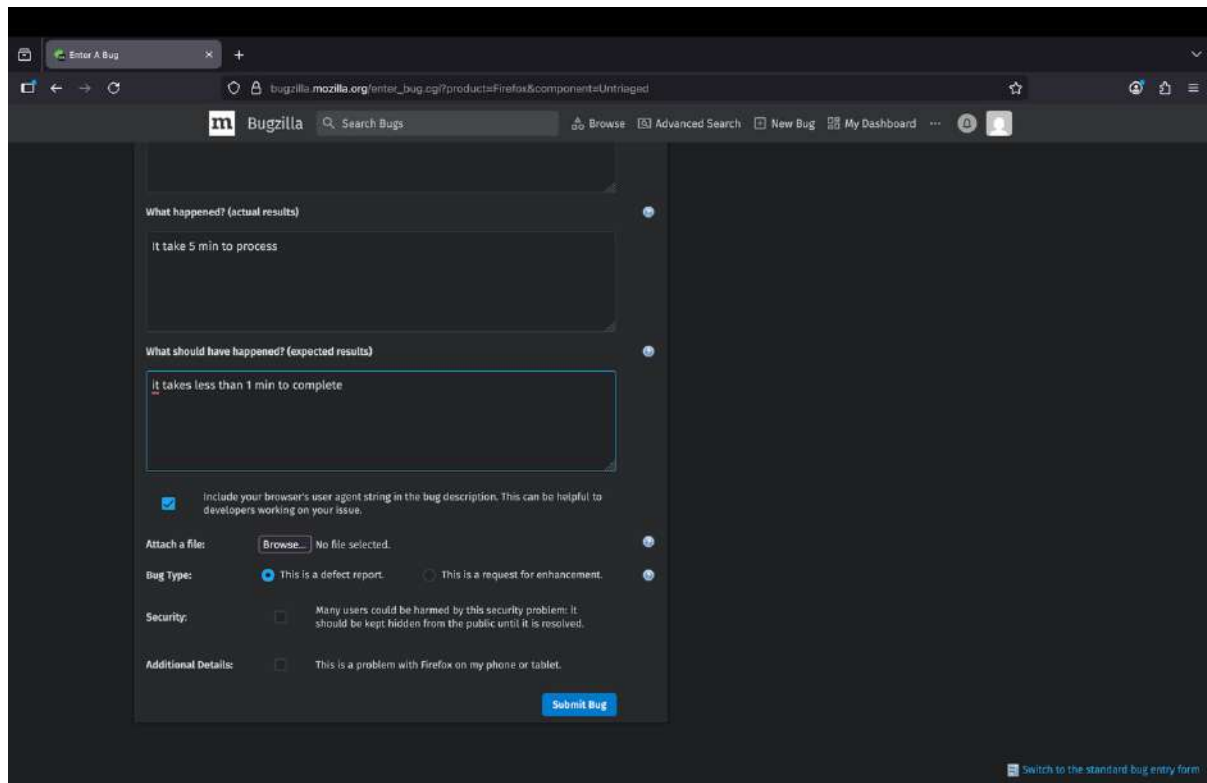

8. Enter Bug information in more detail.

The screenshot shows the 'Enter A Bug' form in a web browser. The browser's address bar displays 'bugzilla.mozilla.org/enter_bug.cgi?product=Firefox&components=Untriaged'. The Bugzilla logo and a search bar are visible in the header. The form itself has a title 'Enter A Bug' and three bullet points: 'Please fill out this form clearly, precisely and in as much detail as you can manage.', 'Please report only a single problem at a time.', and 'These guidelines explain how to write effective bug reports.' The form fields are as follows: 'Summary:' with the text 'The Loading window is not working'; 'Product:' with a dropdown menu showing 'Firefox' and a '(Change)' link; 'Version:' with a dropdown menu showing 'Firefox 14.7'; 'What did you do? (steps to reproduce)' with a large text area and a 'Markdown supported' link; 'What happened? (actual results)' with a large text area; and 'What should have happened? (expected results)' with a large text area. At the bottom, there is a checkbox labeled 'Include your browser's user agent string in the bug description. This can be helpful to developers working on your issue.' which is currently unchecked.

This screenshot shows the same 'Enter A Bug' form, but with some fields filled out. The 'Summary:' field remains 'The Loading window is not working'. The 'Product:' dropdown now shows 'Firefox' with a '(Change)' link. The 'Version:' dropdown now shows 'unspecified'. The 'What did you do? (steps to reproduce)' field contains the text 'I tried load my STS Program directly'. The 'What happened? (actual results)' field contains the text 'It take 5 min to process'. The 'What should have happened? (expected results)' field contains the text 'it takes less than 1 min to complete'. The checkbox at the bottom, 'Include your browser's user agent string in the bug description. This can be helpful to developers working on your issue.', is now checked.

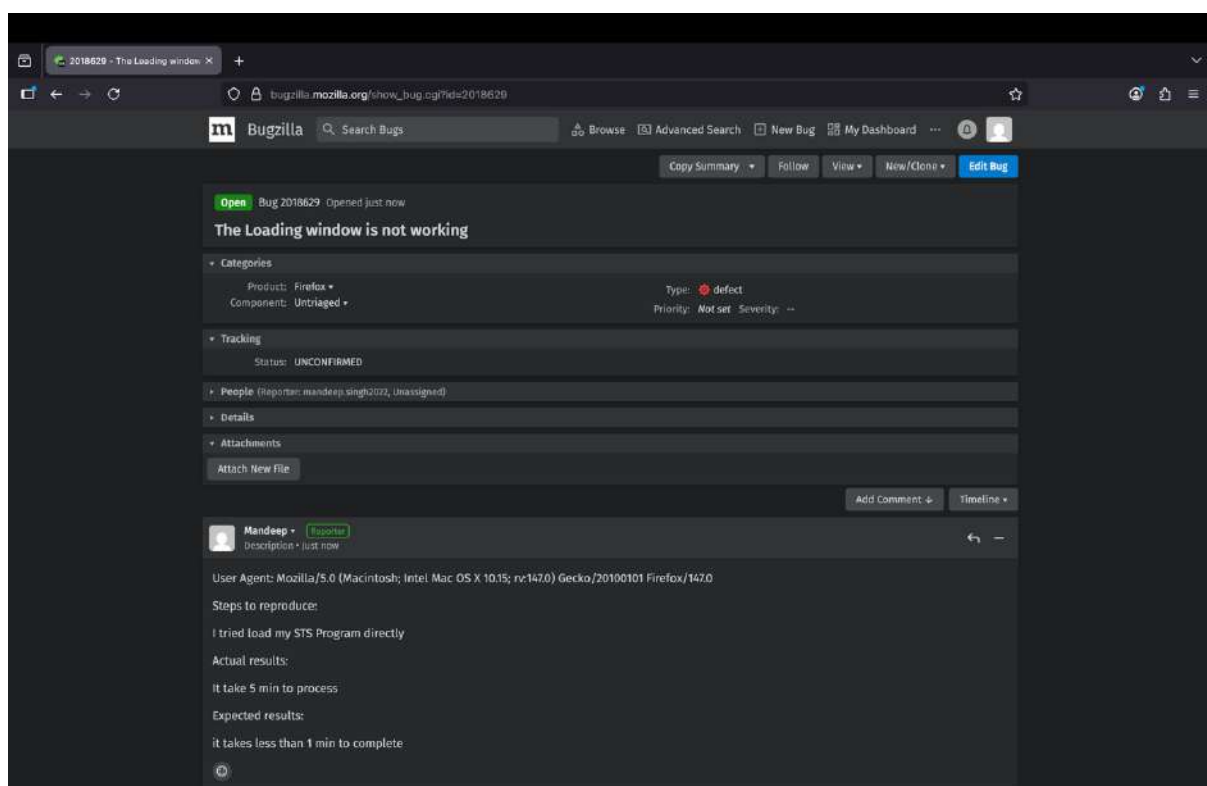

The screenshot shows the 'Enter A Bug' form in the Bugzilla web application. The browser address bar shows the URL: `bugzilla.mozilla.org/enter_bug.cgi?product=Firefox&component=Untriaged`. The form includes the following sections:

- What happened? (actual results):** A text area containing the text 'It take 5 min to process'.
- What should have happened? (expected results):** A text area containing the text 'It takes less than 1 min to complete'.
- Include your browser's user agent string:** A checkbox that is checked, with a note: 'This can be helpful to developers working on your issue.'
- Attach a file:** A 'Browse...' button and the text 'No file selected.'
- Bug Type:** Two radio buttons: 'This is a defect report.' (selected) and 'This is a request for enhancement.'
- Security:** A checkbox with the text: 'Many users could be harmed by this security problem: It should be kept hidden from the public until it is resolved.'
- Additional Details:** A checkbox with the text: 'This is a problem with Firefox on my phone or tablet.'
- Submit Bug:** A blue button at the bottom right of the form.

At the bottom right of the page, there is a link: 'Switch to the standard bug entry form'.

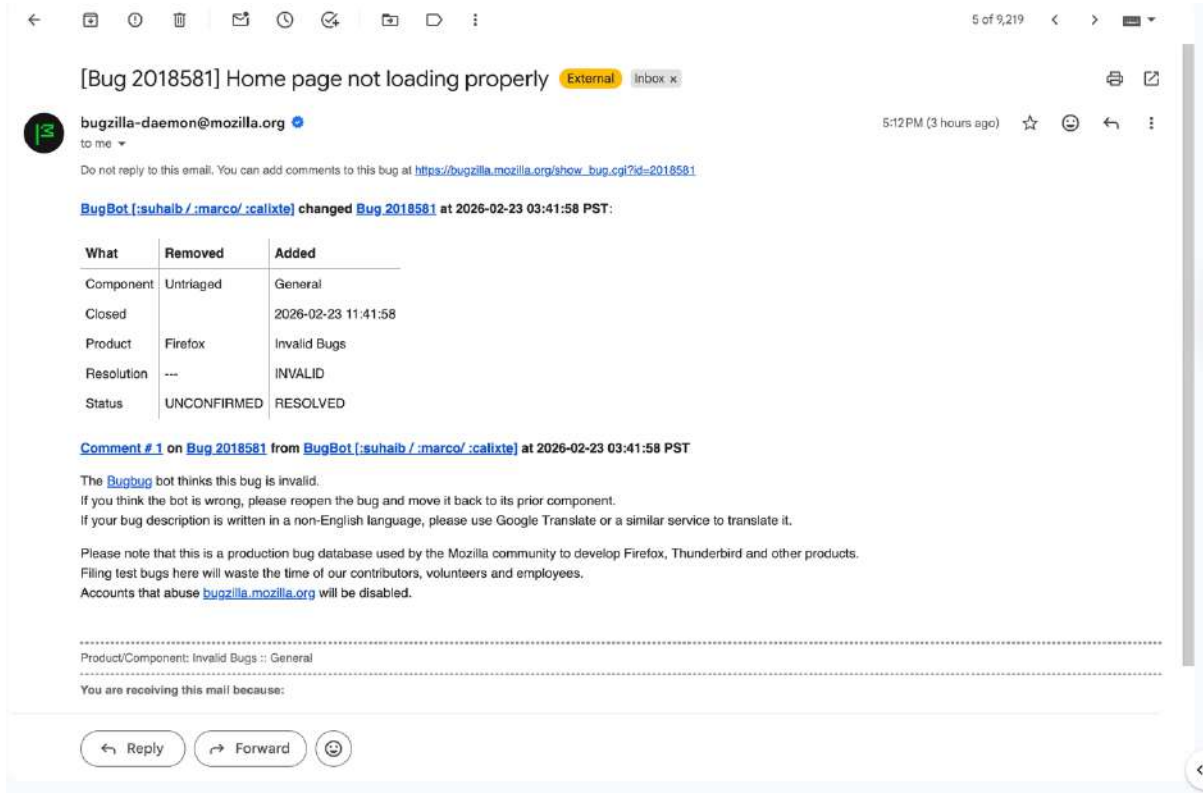

9. Submit the bug

The screenshot shows the Bugzilla bug details page for bug 2018629. The browser address bar shows the URL: `bugzilla.mozilla.org/show_bug.cgi?id=2018629`. The page includes the following information:

- Open Bug 2018629** Opened just now
- The Loading window is not working**
- Categories:** Product: Firefox, Component: Untriaged, Type: defect, Priority: Not set, Severity: --
- Tracking:** Status: UNCONFIRMED
- People:** (Reporter: mandeep.singh2022, Unassigned)
- Details:** Attachments: Attach New File
- Add Comment** and **Timeline** buttons
- Reporter:** Mandeep (Reporter: mandeep.singh2022, Unassigned)
- Description:** User Agent: Mozilla/5.0 (Macintosh; Intel Mac OS X 10_15; rv:147.0) Gecko/20100101 Firefox/147.0
Steps to reproduce: I tried load my STS Program directly
Actual results: It take 5 min to process
Expected results: it takes less than 1 min to complete

10. Wait for the Bugzilla response.

The screenshot shows an email interface with a toolbar at the top. The email is from bugzilla-daemon@mozilla.org and is titled "[Bug 2018581] Home page not loading properly". It is marked as "External" and "Inbox x". The email content includes a notification from BugBot that Bug 2018581 has been changed. A table shows the changes: Component (Untriaged to General), Closed (2026-02-23 11:41:58), Product (Firefox to Invalid Bugs), Resolution (--- to INVALID), and Status (UNCONFIRMED to RESOLVED). The email also includes a comment from BugBot stating that the bug is invalid and provides instructions on how to handle such situations. At the bottom, there are buttons for "Reply", "Forward", and a smiley face icon.

Do not reply to this email. You can add comments to this bug at https://bugzilla.mozilla.org/show_bug.cgi?id=2018581

BugBot [:suhaib / :marco / :calixte] changed Bug 2018581 at 2026-02-23 03:41:58 PST:

What	Removed	Added
Component	Untriaged	General
Closed		2026-02-23 11:41:58
Product	Firefox	Invalid Bugs
Resolution	---	INVALID
Status	UNCONFIRMED	RESOLVED

Comment #1 on Bug 2018581 from BugBot [:suhaib / :marco / :calixte] at 2026-02-23 03:41:58 PST

The Bugbug bot thinks this bug is invalid.
If you think the bot is wrong, please reopen the bug and move it back to its prior component.
If your bug description is written in a non-English language, please use Google Translate or a similar service to translate it.

Please note that this is a production bug database used by the Mozilla community to develop Firefox, Thunderbird and other products.
Filing test bugs here will waste the time of our contributors, volunteers and employees.
Accounts that abuse bugzilla.mozilla.org will be disabled.
